COMPLETE FIT-OUT SOLUTION FOR MAYFAIR OFFICES

When Mantra Interiors was commissioned to create a new, upgraded workplace for a leading financial risk management company, UK furniture manufacturer, Lee & Plumpton, was delighted to be included in the fit-out specification.

The client, J.C. Rathbone Associates Limited (JCRA), is a regulated, independent financial risk management consultancy with offices located in London, New York and an expanding presence across Europe and North America.

Mantra Interiors was appointed to undertake a complete interior design & build fit-out for JCRA's new 9000+ sq. ft office premises in St James's Square, Mayfair, London.

"As the appointed Interior Architects for the project, our brief was to create a visually pleasing and functional interior accommodating meeting rooms, boardrooms, shower and kitchen facilities for the 100 staff members," explains Chris Davies, Project Director at Mantra Interiors.

"We were also required to undertake a complete overhaul of the HVAC and lighting systems as well as refurbish the entire facility. Our goal was to transform the office into an inspirational workspace. An important element of achieving this objective was through specifying and installing quality products and finishes."

Offering a full turnkey service from concepts through to interior fit out and refurbishment, Mantra's reputation for excellence has been further endorsed by the award of 'Best Workplace Design Specialists 2021 – South East England' at BUILD Magazine's Architecture Awards.

The specification for JCRA's project included Lee & Plumpton's Geo 1600mm bench desking together with bespoke 'poseur' height, tall table units with power and data fittings to create a 'hot desking' facility.

The desking area also included Liberty task seating from HumanScale together with top grade, Milliken carpet tiles.

"We were delighted to work with Lee & Plumpton," continues Chris Davies. "We were able to complete the fitout within a 6-week timeframe, which included the implementation of all data and electrical requirements."

Lee & Plumpton's Geo range marries sleek, minimalist design styling with practicality. Featuring an inset intermediate leg and 'floating' appearance 25mm desk surface, Geo is manufactured using heavy grade steel for strength and stability and available with slot-in cable management. The bespoke tall tables were developed from Lee & Plumpton's Planar range. Ideal for hot desking and collaborative working, the tables were fitted with integrated power and data modules.

With its head office in Godalming Surrey and a London showroom, Mantra Interiors specialises in design and build for office interiors. The Company has developed an innovative approach through a series of transparent and clear processes to bring new office designs to life. By identifying and agreeing each stage, Mantra can Fast Track the whole process from brief to handover.
