WELLBEING IN THE WORKPLACE...

In the UK, the typical office worker still spends the majority of their working day sitting down at a desk.

We all know that to make a difference to our general health and wellbeing we need to keep moving. Even something as simple as periodically changing our posture at work can have a positive impact on our physical and mental wellbeing.

InMotion gives you the power to choose the optimum working position for you.

5 BENEFITS OF INMOTION DESKS

Promotes Creativity

Studies show that standing desks can boost creativity and even make you more receptive to collaboration.

Burns Calories

Standing burns more calories than sitting down.

Beats Fatigue

Simply being on your feet can stop you from feeling as tired and boost your motivation.

Better Posture

No more slouching in your chair or hunching over your desk.

Improves Productivity

By standing up you feel more alert, which helps you to stay focused on the task in hand.

AN OUTSTANDING OPPORTUNITY

InMotion is a stylish, ergonomic and competitively priced desk that will help sedentary office workers to become more active.

Sales of sit stand desks are being driven by increasing public awareness of the possible health implications associated with a sedentary lifestyle.

There is a growing body of evidence that, although not conclusive, suggests that being seated for prolonged periods of time could be linked to an increased risk of conditions such as cardiovascular disease.

It is already commonly known that poor posture can lead to musculoskeletal problems, such as chronic backache.
