A COMMITMENT TO SERVICE

Dedicated Customer Service

The values of Integrity, Commitment, Development, Accountability and Teamwork underpin the culture and aspirations of the Company. We strive to design and develop an extensive portfolio of quality products which combine aesthetics and practicality to offer Best Value solutions. The ongoing monitoring of every aspect of the business ensures we are able to implement continuous improvements to maintain our determined commitment to customer service.

Inhouse Delivery Fleet

We operate and manage our own delivery fleet and are targeted for accurate, on time order fulfillment. Rapid turnaround is guaranteed by our weekly scheduled deliveries and, on many items, we also offer a 'Quick Ship' service. Standard deliveries are free of charge with next day delivery on stocked items or customer collection (with 24 hours' notice) also available.

- Quick Ship: Products delivered within 5 working days from your order deadline date.
- Group A: Products subject to a longer lead time (typically 3 weeks).

Extensive Stock Holding

Our 200,000 square feet manufacturing base includes an extensive warehousing facility. We hold stock of an estimated 50,000 items including raw materials and finished goods.

This substantial financial investment provides a further demonstration of our determined commitment to the highest levels of customer service.

INHOUSE EXPERTISE

Bespoke Design

Unlike many manufacturers, we are able to develop customised solutions to match each client's precise requirements. With its own production unit and dedicated team, our Bespoke department can design and manufacture products from original 'sketches' or develop existing range items to customised specifications.

Your dedicated account manager, together with a member of the Bespoke team, will work with you to develop a solution to match your requirement and budget.

Planning & Design

Our highly experienced designers are available to offer expert space planning and design services. Working from simple sketches or architect plans, we can recommend product choice, configurations and finishes to match desired outcomes and available budget.

We are able to advise regarding effective space utilisation and also work collaboratively to consider lighting, team requirements, storage as well as existing building services and future reconfigurations of any environments.

CGI Expertise

We have an extensive library of product images together with a portfolio of 3D CAD files. Customers can download files from our web site or upon request.

The wide choice of CGI, photo-realistic room scenes can help visualise proposed interiors, colours, and designs.

Sales & Customer Support

We know relationships are important. Our nationwide sales team offers 'face to face' meetings to provide expert support, advice and guidance as well as facilitating access to our extensive inhouse services including customised marketing materials, product samples and collaborative events.

Each and every order is carefully monitored and tracked by our customer services team. Fully trained advisors provide a dedicated point of contact to manage queries and requests as well as full after-sales support.

A COMMITMENT TO QUALITY

Continuous investment in facilities and training, coupled with a dedicated workforce and strong supplier relationships, ensures the quality, consistency and reliability our customers expect. The management and measurement of our internal processes and procedures drives our quest for development and improvement and, therefore, ongoing customer satisfaction.

We have an established reputation for the supply of robust, quality products. We design and manufacture to comply with relevant British and international standards – covering dimensions; ergonomics; strength & stability; moving parts; fire regulations; and electrical systems. The inherent strength and durability means that our products will withstand the rigours of daily ‘wear and tear’ thus extending the lifecycle. Our furniture includes a 7-year guarantee (unless specified).

RESPONSIBLE MANUFACTURING

As a major manufacturer, we recognise our responsibility to consider all areas of our business in terms of environmental impact. From management, administration and product design through to facilities management and logistics together with manufacturing processes and procedures, we strive to introduce positive changes to protect the planet.

Our efforts embrace the full spectrum of business activities including reductions in carbon emissions through to waste prevention, recycling initiatives, transportation, investment in solar power and procurement practices. Sustainability and circularity principles are embedded within our product design and development processes. We are committed to minimising our carbon impact and working towards a greener future.

Environmental Management

We measure and assess our efforts through our integrated Environmental Management System. Registered to ISO 14001: 2015, our system incorporates clear objectives which are monitored and measured through a documented programme with regular reviews for continuous improvement.

Chain of Custody

Our Chain of Custody certification (COC) with the Forest Stewardship Council® (FSC®) represents the unbroken path that certificated products take, from the sustainably managed forests of origin, to the consumer.

Sustainability

Created in 2006, the Furniture Industry Sustainability Programme (FISP) has become established as the furniture industry forum on all environmental and sustainability issues. These considerations relate to all aspects of the industry's business, from purchasing and procurement through to end of product life, including social, ethical and employment concerns as well as waste, energy and emissions.

We have achieved full membership of FISP and this enables us to focus on reducing our social and environmental impact. We have been proud members of the Furniture Industry Sustainability Programme (FISP) since 2007. Membership is subject to regular independent re-audits to monitor our continuing commitment.

Energy Management

Our energy management strategy includes a number of practices to minimise usage throughout all areas of the business. In addition, in the last year our solar panels have generated over 160,000 Kwh of electricity. Nearly half of the output is returned to the National Grid – sufficient to power 26 three/four bedroom homes for a year.
